Education

Michigan State University

Bachelor of Arts | Class of 2016

Major: Experience Architecture Minor: Graphic Design

Skills

- Project Management
- Client Relations
- HTML / CSS
- Web Design
- Illustrator / InDesign
- UX Research

Experience

Digital Project Manager - SNworks

My responsibilities at SNworks as a Project Manager include project planning, work-flow management, client communications, and quality assurance.

As an advocate for our clients, I assist them with designing a custom web page that fits their needs. After completing the design process, I coordinate with our development team to bring the design mock-up to life.

While at SNworks I have managed 15 projects through design, development and launch.

IT Technician - MSU National Superconducting Cyclotron Laboratory & WMU Extended University Programs

While working at the NSCL and EUP, I responded to assignments involving installation, modification, and testing of, and support for, hardware and software for desktop PCs, Mac products, laptops, printers, and projectors.

I also managed inventory and supplies for office computer systems and equipment, and trained staff in computer use, both in person and remotely.

Intelligence Specialist Petty Officer - U.S. Navy Third Fleet Command | USS Nimitz

At Third Fleet Command Center, I maintained the indications and warnings watch floor, monitoring operations in the Pacific Ocean and producing daily intelligence briefings for intelligence commanders. I also participated in planning and administrating multiple large-scale naval exercises, training intelligence petty officers.

On the USS Nimitz I was a satellite imagery interpreter; I prepared imagery interpretation reports in support of Operation Iraqi Freedom and Operation Enduring Freedom.
